DETAILED ACTION

Specification

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc. (The Current Abstract is too short)

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Koch
(DE 25 32, 110 A).

Regarding claim 1, Koch discloses a box with six faces (see figure 1) characterized by the fact that all of its faces are constituted by two plates or sheets (2, 3) each folded once and assembled (see figure 2); the fold (5) obtained on each plate or sheet (2, 3) forms a curve which constitutes one of the six faces (see figure 2).

Regarding claim 2, Koch discloses the box with six faces (see figure 1) in accordance with claim 1 characterized by the fact that one of the two plates or sheets (2) comprises two edges cut in a curved way (see figure 2).

Regarding claim 3, Koch discloses the box with six faces (see figure 1) characterized by the fact that the two edges cut in a curved way (see figure 2) of one of the two plates or sheets (2) are surrounded by the fold (5) of the second plate or sheet (3) when the two plates or sheets (2,3) are assembled.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Davidson (US 5,895,884), Blundo (US 6,930,246), Ribet (FR 1,297,214) and Friant (FR 2,509,565) disclose a box assembly.
